Bridges	50%	50%
Dentures	50%	50%
Orthodontia	Not Covered	

* Deductible applies to these services

** Subject to Negotiated fee between participating dentist and MetLife. Negotiated fees are subject to change.

Accessing the Out-of-Network Tier

An example of how seeking out-of-network services can impact your out-of-pocket costs:

Porcelain Crown on a molar - We will estimate that the usual, customary and reasonable charge is considered \$800.

Per the out-of-network benefit structure, you will pay 50% (your coinsurance) toward that crown, which would be \$400.

In addition, if the out-of-network dentist performing your crown services charges more than what is considered usual, customary and reasonable, you will pay the \$400 PLUS any additional amount that the dentist wishes to charge. So, if the dentist charged \$900 for the crown in total, you would pay a total of \$500 for the crown, which includes the extra \$100 that the dentist charged above what is considered usual, customary and reasonable.

Using the out-of-network tier costs you more because the

dentists do not discount their services per a provider contract, whereas those contracts do reduce your out-of-pocket costs in the in-network tier.

When you access care out-of-network, you and the insurance carrier incur more costs, consequently affecting the overall pricing of the plan.
