What is an HMO plan?

Under the HMO model, the member must choose a Primary Care Physician (PCP) contracted with the HMO plan at the time of enrollment (provider directory links are available on the GBS website). Each family member can have a different PCP. Your PCP becomes your healthcare “gatekeeper”.

You are allowed to change your PCP once a month if you are not satisfied with your current choice.

If the member is in need of treatment from a Specialist or is in need of an In-Patient or Out-Patient procedure, he/she must obtain a referral from their PCP prior to any type of consultation or treatment. If the referral is not obtained, no benefits will be paid.

There is no Out-of-Network benefit (except in the case of an emergency).

What is a PPO plan?

There is an In-Network and Out-of-Network component.

The In-Network benefits will be greater than the Out-of-Network benefits.

At the time of service, the member has the ability to seek care from a Specialist, without having to obtain a referral from a PCP.

The contractual agreement between the PPO plan and the Provider is on a “discounted fee for service” basis. This means that the provider who participates in the network has agreed to provide their service on an agreed upon, discounted fee. The Provider who is not in the network will not agree to that discounted fee and will typically charge a “Reasonable and Customary” fee.
